

Digital print finishing solutions

XLA 170

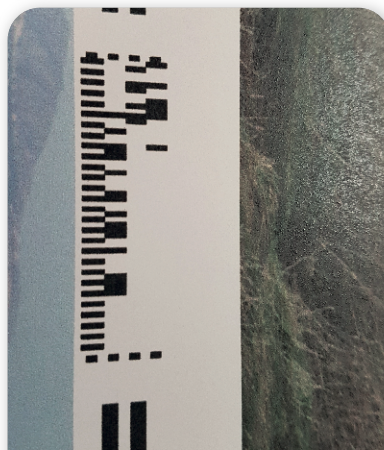

The automatic vertical blade positioning improves automation and allows fully unattended cutting of multiple sizes.

The XLA 170 has the ability to read a printed barcode and automatically adjust the position of the vertical blades, together with the advantages of XLD Series, this creates the ultimate cutting solution for any size.

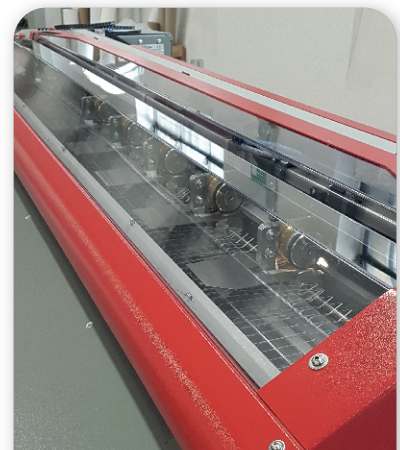

- 01 Barcode is automatically printed by the RIP (contact Fotoba for available RIPs).
- 02 Up to six automatic double vertical blades.
- 03 Can work with most flexible materials (Canvas, Textiles and similar must be tested for correct barcode reading).
- 04 Improve automation removing human error.

Intuitive touch screen

Patented barcode reading

Industrial build

Characteristics

Model	Max cutting width (cm/in)	Mincutting width (cm/in)	Min Roll width (cm)
XLA 170	160/64	21x29,7 8,27x11,69	85
Net weight (kg)	Dimension (cm)	Shipping weight (kg)	Shipping Dimension (cm)
250	281x87x110h	515	303x103x145h
