

## Product: Euro-Flex Gloss Monomeric Vinyl

### Product Description:

Monomeric PVC film, REACH compliant, designed for versatile applications on flat and slightly curved surfaces. Ideal for producing vibrant, colour-intensive prints for short- to medium-term advertising - both indoors and outdoors. Delivers excellent adhesion across a wide range of substrates including plastics, foam board, correx, glass, and aluminium. Optimised for superior print quality, it performs exceptionally well with solvent, eco-solvent, latex, and UV digital printing systems. The grey adhesive enhances opacity for outstanding hiding power, while the bright white print surface ensures vivid image clarity.

### Product structure:

Support	White, glossy monomeric PVC film, 100mic
Interliner	One-side siliconised, surface-coated white paper, 120g/m <sup>2</sup>
Adhesive	Pure polyacrylic, permanent, grey
Total Thickness	0.12mm
Adhesive Weight	20g/m <sup>2</sup>
Durability	3-4 Years
Roll Size	1370mm/50m & 1600mm/50m

## Product: Euro-Flex Matt Monomeric Vinyl

### Product Description:

Monomeric PVC film, compliant with REACH and RoHS standards, designed for versatile use on flat and slightly curved surfaces. Ideal for producing brilliant, colour-rich prints for short- to medium-term advertising in both indoor and outdoor environments. Offers strong adhesion across a wide range of substrates including plastics, foam board, correx board, glass, and aluminium. Engineered for outstanding performance on solvent, eco-solvent, latex, and UV digital printing systems.

### Product Structure:

Support	White, matte monomeric PVC film, 100mic
Interliner	One-side siliconised, surface-coated white paper, 63g/m <sup>2</sup>
Adhesive	Pure polyacrylic, permanent, transparent
Total Thickness	0.12mm
Adhesive Weight	20g/m <sup>2</sup>
Durability	3-4 Years
Roll Size	1370mm/50m & 1600mm/50m
