# Neolt Model 4 Unwinder / Rewinder

Load jumbo rolls by forklift onto a pneumatic expanding shaft. A dancer roller regulates winding speed, while a laser sensor measures the roll diameter.

Standard capacity of 500 kg, roll width of 1,650 mm and diameter of 800 mm

Custom widths up to 5.2 m, with roll capacity, diameter and machine height specified to order

Maximum speed of 30 m/min

Reversible brushless drive, touchscreen, remote control and four safety sensors
